

## HAIRCHITECTURE 101

The Intersection of Hair and Architecture

Look and Learn

While Rome wasn't built in a day, beautifully crafted hair can be. Exceptional hair color goes far beyond basic partials or traditional foiling techniques. In this class, you'll learn how to rethink placement and create dimensional color that brings structure, depth and balance to every head of hair.

We'll dive into advanced highlighting and lowlighting methods helping you master the art of placement, formulation and personalized product selection. By the end, you'll be equipped to design truly customized color for every unique individual who sits in your chair.
